

# ANA Environmental Policy

The Luxembourg Administration de la Navigation Aérienne (ANA), responsible for managing and operating many parts of Luxembourg Airport - the Grand Duchy of Luxembourg's only commercial airport - ensures flights in a safe and efficient way.

ANA, within all areas and activities under its control, will seek to implement all measures and best practices to reduce its environmental impacts and improve its environmental efficiency while considering economic and sustainability aspects, in a manner that is consistent with its legal and regulatory obligations, and with its safety and quality policies.

ANA will engage its employees, the airport community, airlines as well as local residents to ensure sustainability of resources and protection of the environment.

The scope of this Environmental Approach concerns those business activities, services and locations directly under the control of ANA. Furthermore, ANA acknowledges there are activities outside this scope which it can influence and will seek collaboration from all stakeholders.

The Environmental Management System, operating to ISO 14001 standard, is an integral part of the Integrated Management System and is in line with ANA policy, mission and vision.

## COMMITMENTS

- Continuously raise employee awareness of the importance of environmental protection in the fulfilment of their duties.
- Co-operate with government authorities, the community and its other stakeholders to improve environmental protection practices, encourage use of sustainable resources, protection of biodiversity and ecosystems and adaptation to climate change.
- Prevent pollution and minimize the environmental impact caused by the operations within its areas of control, as well as by its administrative and procurement activities.
- Conduct environmental monitoring of ongoing operations at the airport of Luxembourg by setting environmental key performance indicators and ensure continuous improvement of its environmental performance.
- Reduce noise impact by adopting efficient operational procedures.
- Ensure compliance with applicable legislation and regulations in matters pertaining to the environment, as well as with all other requirements to which ANA subscribes.
